Mr J. A. Malone,
Washington, D.C.

Dear Sir:

I have been interested in the
case of Mr. Power and it has recalled
to my mind a story of Russia claimed
that they had a defence for any
attack by plane that crossed over
their border. It was shown in
one of my papers about 5 or 6 yr ago.
It was a series of rocket spased
on their border and could bring down
any plane flyover. If they did not
have to make hit the concussion
would remove the plane just as
it did his.

The rockets were spaced at intervals
1 1' 1 1' 1' with a tower every
so far. and wired to rockets claimed
to bring down any high flying plane.
His description of concussion answered
that very close. The Orange flair was
another after effect of a bomb.

Best Yours
